Profile

Service-oriented IT Support and Security Specialist with a Master's background in Information Technology and hands-on experience supporting users, workplace technology, endpoint devices, Microsoft 365, access issues, networking fundamentals, and security-focused operations. Experienced in a lean, hands-on environment where reliability, clear communication, and ownership matter. Especially motivated by roles where technology quietly enables exhibitions, events, hospitality, visitor experience, and smooth collaboration

Work Experience

IT Implementation Specialist

Just Access e.V., Heidelberg, Germany

Jun 2025 – Present

- Support daily IT operations across Windows, macOS, Microsoft 365, endpoint devices, user accounts, and cloud-based collaboration tools.
- Work directly with users to understand technical problems, clarify needs, and translate complex system issues into clear and practical explanations.
- Support onboarding, offboarding, account setup, device provisioning, access management, and troubleshooting workflows.
- Analyse user-facing technical issues and provide structured guidance, documentation, and escalation where needed.
- Maintain IT asset records and technical documentation to improve transparency, continuity, and operational decision-making.
- Collaborate with internal teams and external vendors on technical, operational, and security-related questions.
- Contribute to vendor and platform assessments involving data protection, ISO/SOC 2 considerations, risk review, and practical system usability.
- Developed a strong interest in how digital systems can be designed to support human decision-making, trust, and clear communication in real work environments.

IT Support

Sevika Tech Pvt Ltd, Chennai, India

Oct 2020 – Sep 2021

- Provided remote and onsite support for Windows client devices and enterprise users.
- Assisted with account setup, endpoint support, system configuration, and operational troubleshooting.
- Supported workstation deployment, software rollout, and patching activities across departments.
- Coordinated with cross-functional IT teams to resolve more complex incidents.

Education

M.Sc. Information Technology

Oct 2023 – Mar 2025

SRH Heidelberg University, Heidelberg, Germany

Relevant focus: machine learning, intelligent systems, technical computing, applied AI, data analysis.

Master's Thesis: A Novel Dynamic Malware Analysis Using Machine Learning

Developed and evaluated hybrid classification models using CNN, LSTM, and Random Forest approaches.

Compared different feature extraction and representation methods including TF-IDF, Count Vectorizer, and

Word2Vec to study their effect on classification performance. Designed preprocessing, training, and evaluation workflows in Python and analysed the strengths and limitations of different model architectures for complex classification tasks. Achieved strong classification performance through hybrid CNN/LSTM-Random Forest modeling with systematic comparison of feature representations and tuned evaluation workflows.

Executive Post Graduate Diploma in Cybersecurity
International Institute of Information Technology, Bangalore, India

Sep 2021 – Nov 2022

Bachelor of Engineering in Electronics and Communication
R.M.D. Engineering College, Chennai, India

Jun 2016 – Nov 2020

Skills & abilities

Programming: Python, SQL, JavaScript, basic Bash

Machine Learning: PyTorch, scikit-learn, neural networks, supervised learning, model evaluation, classification pipelines

Data Techniques: feature engineering, TF-IDF, Count Vectorizer, Word2Vec, preprocessing, dataset preparation, comparative experiments

Software and Development: FastAPI, Git, Jupyter, VS Code, REST APIs, PostgreSQL

Concepts: interpretable AI, uncertainty-aware evaluation, model comparison, deployable ML systems, data-driven problem solving

Systems Exposure: Microsoft 365, endpoint support, technical troubleshooting, documentation, networking, VMware, Windows environments

Language

Tamil: Native

English: C1/C2-level professional proficiency in reading, writing, speaking, and interaction

German: Working proficiency(B1)

Hobbies and Interests

- Hiking, travel, and exploring cities through history and architecture
- Fitness, long walks, and disciplined routines
- Writing technology/security notes and building practical IT/security projects
- Cooking and learning recipes from different cultures
